

Amendments to the Claims

The following listing provides a copy of all pending claims and a status of each claim. Claims 12-22 are pending. Claims 13 and 15 are currently amended. Claims 12 and 14 are cancelled. This listing of claims will replace all prior versions of claims.

Listing of Claims

1. - 12 (canceled)

13. (Currently Amended) A folding pocket wallet that, when unfolded into its open configuration, is substantially shaped as an isosceles trapezoid whose two diagonal legs are each convexly rounded, said unfolded folding pocket wallet thereby comprising
- (a) a longest edge corresponding to the lower base of said trapezoid;
 - (b) a shorter edge corresponding to the upper base of said trapezoid, said shorter edge defining the edge of a money pocket within said folding pocket wallet through which edge may be passed folding money;
 - (c) two opposing ends;
 - (d) two convexly rounded edges corresponding generally to the diagonal legs of said trapezoid and extending from said shorter edge to said two opposing ends; **[[and]]**
 - (e) a fold line extending from the midpoint of said longest edge to the midpoint of said shorter edge; whereby folding closed about said fold line creates a substantially flat folding pocket wallet shaped to fit a front trousers pocket, and whereby use of said substantially flat folding pocket wallet obviates spinal misalignment and neural damage**[[.]]**;
 - (f) a separate outer panel;
 - (g) a separate inner panel; and
 - (h) a separate separator panel disposed therebetween;
- each of said panels substantially identical in shape and outline, aligned to and stitched or otherwise fastened along said longest edge and along at least a portion of each of said opposing ends.

14. (Cancelled)
15. (Currently amended) The folding pocket wallet of ~~Claim 14~~ Claim 13 wherein each of said outer panel and said inner panel further comprises an exposed surface and a hidden surface, said folding pocket wallet further comprising at least one internal panel substantially identical in shape and outline to said outer panel and said inner panel and likewise comprising an exposed surface and a hidden surface, each said internal panel hidden surface disposed against said inner panel hidden surface, said outer panel hidden surface, or both, and stitched or otherwise fastened thereto along the entire perimeter thereof.
16. (Previously presented) The folding wallet of Claim 15 wherein said internal panel further comprises at least one card pocket fastened to said exposed surface thereof.
17. (Previously presented) The folding wallet of Claim 15 wherein said internal panel further comprises at least one key pocket fastened to said exposed surface thereof.
18. (Previously presented) The folding wallet of Claim 15 wherein said internal panel further comprises at least one through slot creating thereby a key pocket between said internal panel and said inner panel or outer panel to which said internal panel is fastened.
19. (Previously presented) The folding wallet of Claim 15 wherein said separator panel comprises at least one key pocket fastened thereto.
20. (Previously presented) The folding wallet of Claim 15 wherein said inner panel further comprises a transparent window pocket fastened on the exposed surface thereof.

21. (Previously presented) The folding wallet of Claim 15 wherein said inner panel further comprises a series of parallel through slots and a corresponding series of fabric layers forming thereby a series of overlapping pockets on said hidden surface thereof.
22. (Previously presented) The folding wallet of Claim 15 wherein said inner panel further comprises at least one through slot forming thereby a hidden pocket between said inner panel and said internal panel.
